

MINI-REVOLUTION

ERGONOMIC GRINDING SOLUTION

MINI-REVOLUTION

COMMERCIAL CANNABIS GRINDER

Specially made for cannabis, the small-but-mighty Mini-Revolution delivers a homogenous, consistent grind optimal for evenly packed pre-rolls and high-yield extraction. Perfect for facilities on a budget.

- **Variable Speed Control**
- **Interchangeable Fine & Coarse Blade Discs**
- **Cuts Flower Versus Extruding, Smearing, Pressing, or Whipping**
- **Less Terpene, Cannabinoid Loss Than Competitors**
- **Leaves Stems & Seeds Wholly Intact for Easy Post-Sifting**

INCLUDES:

FINE BLADE DISC

COARSE BLADE DISC

COLLECTION BIN

WHY THE MINI- REVOLUTION?

PROPRIETARY SINGLE-BLADE SYSTEM

Say goodbye to aggressively milling, grinding, or weed-whacking your precious flower to dust. The Mini-Revolution utilizes an extremely sharp, custom singular blade system to slice through flower directly and with circular motions for the cleanest cuts possible, minimizing product degradation and maximizing potency.

CLEANS YOUR BUDS RIGHT OFF THE STEM

The closed-loop system provides a continuous clean-cut product that is completely controlled with the pushrod attachment. The flat-blade oscillation then compels material to grind off the stem avoiding clogs by minimizing the pathway your bud goes into the blade. With two different blade sizes to choose from you will always experience a clean cut with minimal stem contaminating your product. Watch the stems fall out whole for easy dicarding!

INCREASE PROFIT MARGINS

The Mini-Revolution produces the proper particle sizing crucial to pre-roll efficacy and achieving the highest yields in extraction. In addition to product cost savings and maintaining a high-quality end product, the grinder helps increase your profit margins by speeding up processing and decreasing your labor costs.

MINI-REVOLUTION

ACCESSORIES

Blade Disc

Available in Fine or Coarse

Collection Bin

For Material Collection with the Mini-Revolution

Sifter Screen

Manual Micron Screen for Sifting
Available in 1/8" or 1/4" Sizes

COMPLETE PRE-ROLL SOLUTIONS

MODULAR SYSTEMS FOR FACILITIES OF ALL SIZES

GRIND.

PACK.

WEIGH.

FOLD.

Step 1.

Grind and prep flower with the Revolution.

Step 2.

Add papers, then place trays into RocketBox. Add material to fill and pack.

Step 3.

Place filled tray onto LaunchPad for a quick QC on weights.

Step 4.

Add tray into the Closer and press Go. Folded joints are dispensed for easy collection.

STM PRE-ROLL BUNDLES

The perfect bundle to get your facility started in optimal pre-roll prep and production.

MINI PRE-ROLL BUNDLE

(1) Mini-RocketBox Pre-Roll Machine

INCLUDED ACCESSORIES

- (1) 143-Joint Top Tray
- (1) 143-Joint Bottom Tray
- (1) Mini Loading Box
- (1) Density Testing Cylinder

(1) Mini-Revolution Grinder

INCLUDED ACCESSORIES

- (1) Fine Blade Disc
- (1) Coarse Blade Disc
- (1) Collection Bin
- (1) 2-Pack Extra Blade Discs

2.0 PRE-ROLL BUNDLE

(1) RocketBox 2.0 Pre-Roll Machine

INCLUDED ACCESSORIES

- (1) 453-Joint Bottom Tray
- (1) 453-Joint Top Tray
- (1) Loading Box
- (1) Density Testing Cylinder

(1) Revolution 2.0 Commercial Grinder

INCLUDED ACCESSORIES

- (1) Dual-Blade Set
- (1) Fine Particle Screen
- (1) Coarse Particle Screen
- (1) Pair of Cut-Proof Safety Gloves

FREQUENTLY ASKED QUESTIONS

HOW DOES THE MINI-REVOLUTION WORK AND COMPARE TO OTHERS?

Versus forcibly breaking down flower into smaller particle sizes using a plastic whip, blender, or milling mechanism, STM's proprietary, sharp flat-blade system minimizes product degradation by creating a narrow pathway while introducing material into the blades. Carefully slicing through the material with direct cuts in a circular motion.

This system reduces trichome loss and helps to maintain flower quality and integrity. To combat the loss of precious terpenes and cannabinoids, the Mini-Revolution runs at a significantly lower RPM than competitors and stays far below volatile temperatures.

HOW DOES THE MINI-REVOLUTION DEAL WITH SEEDS AND STEMS?

The Mini-Revolution is meant for general use with flower buds versus whole plant material, trim, seeds, or stems. "Quality-In Quality-Out" is a key factor with any industrial hemp and marijuana equipment, so like anything else, we always recommended to destem and deseed your material as much as possible prior to machine use.

Equipped with a sharp, scalloped-blade disc, the STM Mini-Revolution is specially designed to remove flower off stems before cutting. This allows for stems and seeds to remain wholly intact, making post-sifting a quick and painless process.
